

## SUPPLIERS OF MATERIALS TO DIFFERENT INDUSTRIES IN GLOBAL MARKETS.

### ISCL SOLUTIONS

We take pride in the ways we serve our clients. At ISCL Solutions, we are constantly exploring innovative approaches to enhance our offerings and seamlessly integrate new technological solutions that simplify, streamline, and accelerate your procurement process.

We thrive on the dynamic nature of our industry, adapting to meet evolving client demands. No matter the requirement, we understand your needs and strive to add quality, innovation, and efficiency at every stage of your supply chain.

ISCL Solutions maintains a vast inventory of high-demand materials to ensure quick turnaround times and reliable delivery for our clients' projects. Our proactive approach allows us to offer seamless support and prompt service. Additionally, we actively engage with leading global enterprises such as Chevron, Total, Exxon, and other industry giants, both in the United States and internationally. Our partnerships with these industry leaders demonstrate our capability to deliver superior products and dependable solutions in a highly competitive marketplace.

At ISCL Solutions, we specialize in providing a diverse range of high-quality products tailored to the needs of the oil and gas industry. Our extensive inventory includes:

## VALVES & FITTINGS

We supply a wide array of valves, including gate, ball, check, and control valves, alongside precision-engineered fittings. These components are designed for reliability, safety, and operational efficiency, ensuring optimal performance in demanding applications.

## BOP ELASTOMERS – OEM CAMERON – HYDRIL - AFTERMARKET

Our BOP components are crucial for maintaining safety and operational integrity in high-pressure drilling environments. The elastomers we supply are built to endure extreme conditions, including severe temperatures and corrosive substances, making them ideal for challenging oil and gas applications.

## STEEL PIPES & PRODUCTS

We source steel pipes that meet stringent industry standards, ensuring durability and reliability in high-pressure and corrosive environments. Our extensive inventory enables us to provide swift delivery and superior support to our clients' projects.

## CONTROL VALVES

Our control valves are engineered to regulate fluid flow and pressure, ensuring efficiency and safety in dynamic operational environments. We provide an array of designs to meet various industrial requirements.

## COUPLING & FLANGES

ISCL Solutions offers couplings and flanges manufactured to meet rigorous industry standards. These components facilitate easy assembly and maintenance, ensuring compatibility and reliability in a range of piping systems.

## GASKETS – OEM

We provide a broad selection of gaskets designed for optimal sealing in diverse applications, from oil and gas pipelines to high-pressure vessels. Our gaskets are available in various materials, including rubber, PTFE, and metal, ensuring compatibility with different fluids and operational conditions.

## BOLTING AND FASTENERS

Our high-quality bolting solutions include bolts, nuts, washers, and specialty fasteners engineered to meet API standards. Designed for extreme conditions, our fasteners offer the necessary strength and corrosion resistance required in oil and gas operations.

## COUPLING & FITTINGS

We supply a variety of high-power cables designed for the challenging conditions of the oil and gas industry. Our cables ensure reliable electrical performance in harsh environments, promoting safety and efficiency.

# ELECTRICAL AREA

## CABLES – EOM

We provide a comprehensive range of power generators, including diesel, gas, and portable models, all built to meet stringent safety and environmental regulations. These generators deliver dependable power for drilling sites, offshore platforms, and remote industrial locations.

## POWER GENERATORS - OEM

We provide a comprehensive range of power generators, including diesel, gas, and portable models, all built to meet stringent safety and environmental regulations. These generators deliver dependable power for drilling sites, offshore platforms, and remote industrial locations.

## EXPLOSION-PROOF- OEM

ISCL Solutions specializes in explosion-proof lighting systems designed to enhance safety in hazardous environments. Our solutions help prevent ignition of flammable gases and dust, making them essential for use in refineries, offshore platforms, and chemical plants.

COOPER Crouse-Hinds

# CRANES & LIFTING

We offer a wide range of lifting solutions, including mobile cranes, overhead cranes, hydraulic cranes, slings, hoists, and load hooks. Our inventory supports both onshore and offshore lifting operations, ensuring compliance with stringent industry safety and performance standards.

By maintaining strategic partnerships with leading manufacturers, ISCL Solutions ensures access to high-quality parts and components that support the maintenance and operational continuity of critical systems. Whether providing complete setups or replacement parts, we are committed to delivering timely solutions that minimize downtime and maximize productivity.

At ISCL Solutions, we are dedicated to delivering quality, innovation, and reliability in every aspect of our business. Contact us today to learn how we can support your procurement needs and project success.
